

Youtube and work associated

Basics:

Enter url then can print the frame associated. It can be if we know how to do it.

Can create frame from the given url.

If the frame is given can print on the same page the video.

Can put a link to youtube video.

There is or are extra option(s):

we put normal that is the behavior, link or lien (option not fixed yet) then print a link to the related site.

Security:

print or not according to security rules (IP addresses permissions). This is not fixed yet.
