See me in
the demo
([Click Here](#))

This Geo Ip Location service (IP Address Map lookup service) is provided for FREE by **Geobytes, inc** to assist you in locating the geographical location of an IP Address. [Click here](#) to checkout our other FREE localization services.

Did you know that you can use this service programmatically?
For example, in PHP you would access this service as shown in this sample:

```
$tags = get_meta_tags('http://www.geobytes.com  
/IpLocator.htm?GetLocation&template=php3.txt&IpAddress=86.69.44.177');  
print $tags['city']; // city name
```

There is more info [here](#), but basically you get the first 20 lookups per hour for free and then only pay 1 Mapbyte (@ 1 tenth of a cent) per look up after that. [Click here](#) to purchase 10,000 Mapbytes for \$10 (Or [click here](#) to purchase via PayPal).

Another option to consider is our [GeoDirection](#) service.
