Problem: we can
use ~~XML~~ BASIC. ~~Scenario~~
One scenario: we have

allow.cgi and the program
format the DB to XML format.

1st round: if it does not exist

DB format XML are created.

use 2: DB format XML
exist. If date of modification
is greater than DB XML then
we update XML the DB

use 3: if DB not
modified then it is
ok we don't need to
modify the XML DB.

2nd round:

Access data.

opt maof - XML
returns XML file
for printing

ABM/R/Pictures

MAOP HMI HEADER
