IP LOCATOR & IP LOOKUP

Before you can set out to [change IP](#) or [hide your IP address](#) you must know what it is. The easiest way to determine 'what is my IP address' and to find IP address location is to use our IP lookup also known as IP Locator tool.

▶ With the IP lookup or IP Locator tool you can easily track down hosts and websites as well as determine your own IP address. Our IP address lookup tool provides the computer user with several important pieces of information in addition to the 32 bit IP address.

IP Location by city, state, ISP

An IP lookup tool from IP-Address.org will provide you with geographical information regarding a computer user.

By entering an IP address into the IP address locator tool you can determine where a computer user is located by city, state and you can also determine who their ISP (Internet Service Provider) and Organization is. The IP lookup tool may even include a zip code. The accuracy rate of our IP locator tool is very high.

IP Lookup and IP Location Map

When using an IP lookup aka IP Locator tool you'll often see results as they zero in on a map. The IP Location map will include information such as longitude and latitude and may have a marker

which shows where the computer user is from.

Accuracy from our IP locator tools is very high. Even if the results are sometime not 100% accurate they are valuable and can help you determine a number of different factors.

Start to Trace IP Location with IP Locator

Lookup with IP Locator

Notice: If you lookup domain names instead of IP address then only domain names without prefix http:// are accepted.

IP Lookup not accept: <http://www.ip-address.org> or <http://ip-address.org>

IP Lookup accept: www.ip-address.org or ip-address.org

IP Tracer & IP Tracker

We are very happy to present you IP-Address.org. The place where you will find the most powerful IP tracer and IP tracker tools on the Web. All our IP tools are free of charge.

IP Tools

The idea behind our site is to give you all available IP tools for free which will help you to find out anything what you need to know about owner of any IP address or domain.

IP Location Finder

The site is still in development and the new IP finder modules will be added to our project in future. Right now you can use any of IP

IP Address Locator: What Is My IP Address

Find IP - LAN IP Finder

In addition to your IP address, a IP lookup tool may also find the IP address of your local area network (LAN) and detailed information. Some people may be surprised to discover how much information is available online simply by [checking an IP address](#). Those who are concerned about their security should take steps to ensure that their information is protected when online. If you are concerned about your security and think that your information may be compromised you may feel best by using a proxy server.
