

The architecture (20140424)

History

Previously we were able to record information regarding time, where and, when.

Now in 20140424

We have to figure out how a method on how to detect what was the method of connection: computer, cell, ... See how to detect the browser used for instance ie, ... Once we get the IP address detect from the IP address the GPS coordinates and, from GPS coordinates the weather forecast of the moment.
